2008-2009

We love snow.

So will you, no doubt, if you let our snow throwers do the back-bending job. Our mission is to help nature along and rearrange the drifts to where you want them. The idea is for you to spend less time on the drive and more on the slopes – or in front of the fire. Pop into your nearest Stiga dealer and lay your hands on a snow thrower to find out why we think that a covering of snow is the best type of covering!

ROYAL LINE

Aimed for long working days, with large amounts of heavy and icy snow. Features include maximum engine performance for breaking up snowdrifts, differential and MaxiGrip tyres for maximum grip, hydrostatic transmission for ease of use and electrically heated handles to keep you warm. In addition, you can work safely and efficiently in the dark thanks to powerful halogen lighting.

Standard on the Royal Line range: 230V Electric start • Electrically heated handles
Asymmetric halogen lighting • **Discharge chute:** Vertically and laterally adjustable from the panel • Saw toothed auger with bearing mountings • 16" MaxiGrip tyres

DUOLINE+

These durable two stage throwers are designed for those with high demands. Deep snow and high snowdrifts are no obstacles. The toothed auger collects the snow and blows it out via a fan housing to where you want to relocate it – up to 12 m away from the machine. With Duo Line+ you also get differential to retain traction while doing a sharp turn.

Standard on the Duo Line + range: 6 forward gears • Electric start and halogen lighting
One hand grip (dual) • Vertically and laterally adjustable discharge chute • Toothed auger
Differential • 16" MaxiGrip tyres

SNOW FLAKE/18-2829-29

SNOW POWER/18-2847-29

DUOLINE

Adjustable in working height, two stage throwers can be used on most types of surface. Note the adjustable discharge chute, which enables you to control where you relocate the snow. One hand grip and adjustable skid shoes (no bending required) are also included as standard on all Duo Line throwers.

Standard on the Duo Line range: Breaks through snowdrifts • Vertically and laterally adjustable discharge chute • One hand grip • Adjustable skid shoes

SNOW BLIZZARD/18-2830-29

SNOW CRYSTAL/18-2814-29

SNOW CUBE/18-2803-29

SNOW SPARK/18-2857-29

compact line

These easy-to-handle, single stage snow throwers are driven forward by the auger, which collects and blows out the snow in one go. They are best for use on asphalt and other hard surfaces and are also a good environmentally-friendly choice. They are easy to transport and store thanks to their compact shape and folding handle.

Standard on the Compact Line range: Vertically and laterally adjustable discharge chute
Durable, rubber coated augers
